Austructures Pty Ltd

ACN: 113 589 718  
ABN: 80 113 589 718

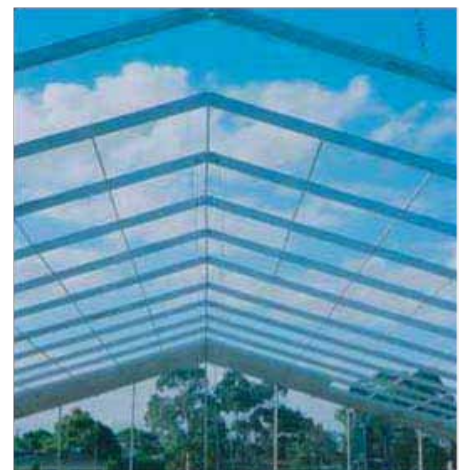

## Group Introduction

**Pages Equipment Hire** is proudly recognized as the most experienced major event hire and Manufacturing Company in Australia.

Through our affiliated company **Austructures** we have designed some of the most innovative semi permanent structures (marquees/tents) in the world. The brand by which our market leading structures are known as is **Hurricane**.

Our continued success is a result of much time and effort put into designing and manufacturing our own custom structural designs. This is then supported by an extensive risk management assessment to ensure there is no risk by the hardware supplied to any of our client's.

As a company we look to develop ongoing relationships with our clients/Partners to ensure that The Austructures high strength aluminium frames offer a wide range of options for larger span, semi-permanent and permanent structure requirements.

## Hurricane Advantages

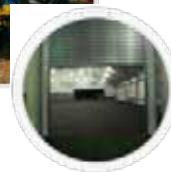

### Speedy Installation

Hurricane relocatable structures are available in short lead times. Structures can be erected and dismantled quickly and efficiently to minimise disruptions and downtimes. The Hurricane Structures Team is extremely skilled in providing fast, efficient service

### Superior Design

The structures are custom designed and engineered to meet Australian, American and European standards AS1170.2 1985, wind loads AS1664.2 1997. Hurricane structures are engineered with a 30% increase in structural capacity to the equivalent European product

### Accessory options include

- Vehicle access door systems
- Personnel doors
- Mechanical ventilation systems
- Integration with HVAC
- High bay lighting systems
- Fire safety systems

## Industrial & Mining Uses

Disaster management facilities

Additional manufacturing space or refining space

Site Shutdowns

Special projects fabrication space

Heavy machinery maintenance facilities

New vehicle stockpiling

Hazardous materials works containment facilities

Staffing Camps

Major event pavilions

Temporary media facilities

Mining Machinery Housing

Passenger Terminal

Temporary retail and commercial facilities

Temporary and reloadable construction shedding

Airplane hangar facilities

Hazardous materials containment facilities

Accommodation

Perspex pool cover

Warehousing (Short or long term)

Environmental shelters

Dust & odour suppression facilities

Manufacturing/Fabrication facilities

Construction shedding

Temporary workshop facilities

# Hurricane Structures

Through innovative use of our in house resources we are able to create facility options that are unique and create maximum impact. The Austructures pre-engineered range of clear span fabric structures are designed to be quick to install, easily relocatable, and fully recyclable. Structure profiles range from 6 metres up to 100 metres wide.

The custom designed, modular aluminium frame structures are engineered to meet, and often exceed, Australian and International building codes and standards.

The Austructures high strength aluminium frames offer a wide range of options for larger span, semi-permanent and permanent structure requirements.

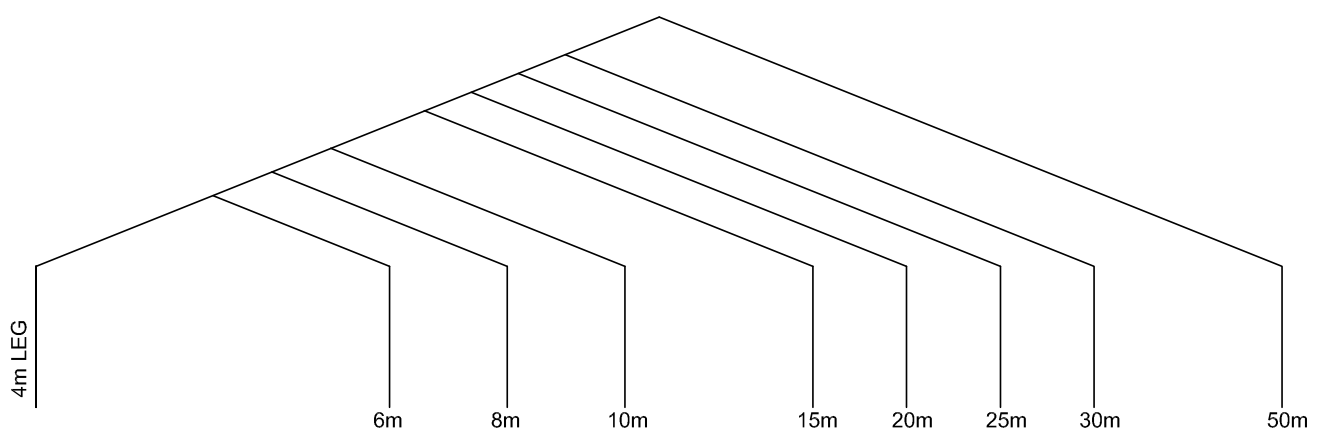

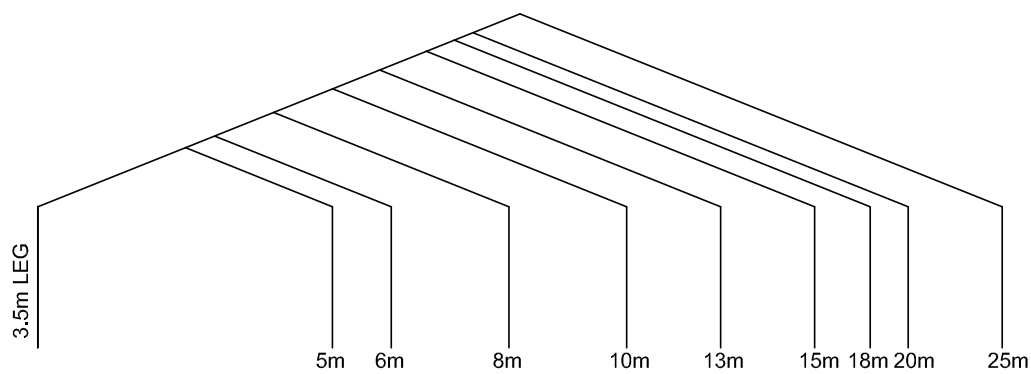

Hurricane Structures is committed to providing clients with products that meet or exceed their expectations. It is the practice of Hurricane Structures to design and maintain specific QA/QC plans for all projects involving non-standard procedures.

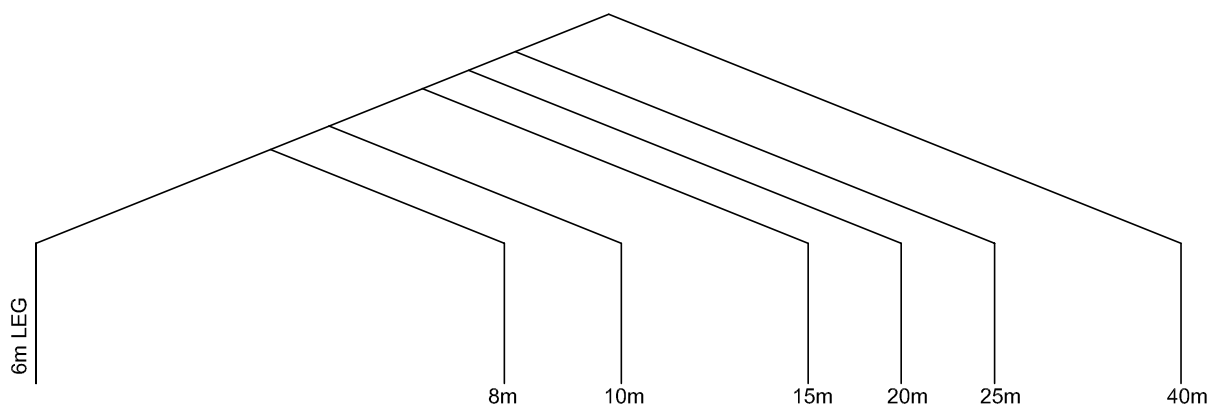

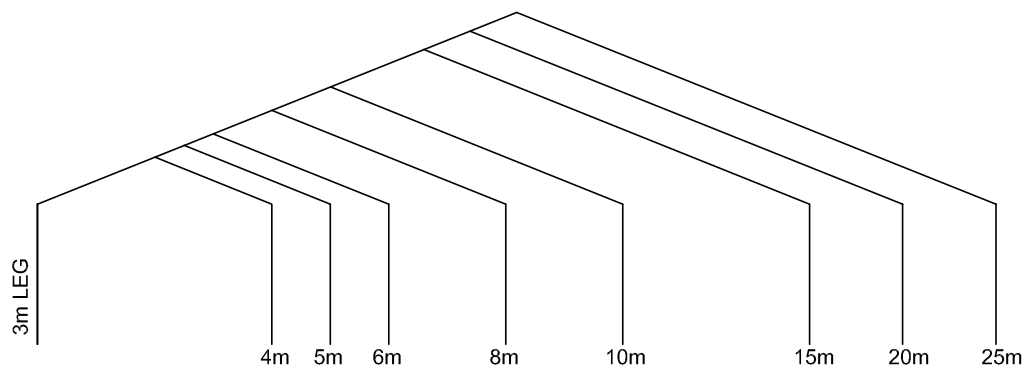

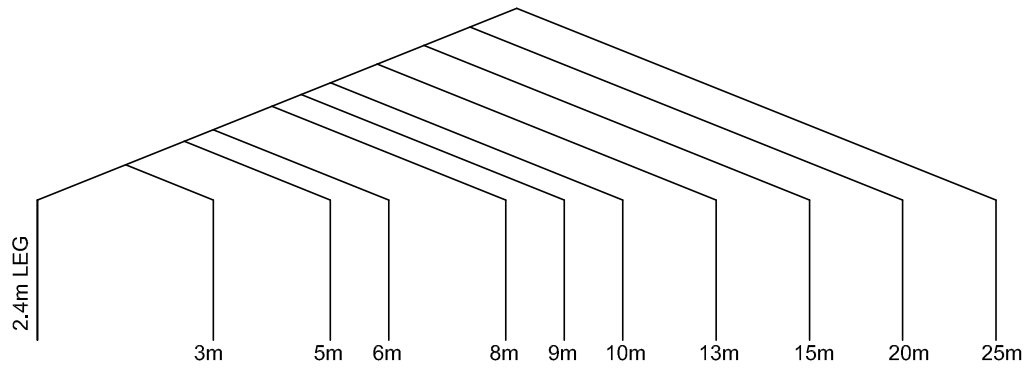

## Quality Assurance

For the past 20 years Hurricane Structures has combined design innovation and practical experience to produce a cost-effective solution to specific customer requirements.

We would be more than pleased to offer an inspection of our facility and an introduction to our project team. The following information will give you an indication of the potential for the product as well as setup times, sizing and our Design and Manufacturing ability.
